ANDRIY SHTUMPF

Palm Coast, FL | (347) 302-2773 | shtumpf.andriy@gmail.com | linkedin.com/in/andriy-shtumpf | www.andriyshtumpf.dev

Full-Stack Software Engineer | Java | Javascript | Typescript | Spring Boot | React | AWS | Microservices

Professional Summary

Full-Stack Software Engineer with over seven years of experience in developing high-performance web systems using Java and React for major clients such as HCSC. Achievements include leading a successful migration to microservices that cut deployment time by 42%, automating CI/CD processes resulting in a 60% reduction in downtime, and mentoring junior engineers which improved team delivery cycles by 22%. Recognized for contributions to system optimization through data-driven solutions that enhanced user engagement metrics.

Core Competencies

Java (8–17+) • Javascript • Spring Boot / Cloud / WebFlux • React • Next.js • TypeScript • Node.js • Microservices • REST / GraphQL APIs • AWS • Docker • Kubernetes • CI/CD (GitHub, Jenkins, Concourse) • PostgreSQL • MongoDB • Redis • Neo4j • Kafka • TDD • Agile / Scrum • Event-Driven Architecture •

Professional Experience

FULL-STACK SOFTWARE ENGINEER | ELEKS Inc. (Contractor to a leading US health insurance provider) - Florida, USA (Sep 2021 - Present)

• Engineered migration from Java 8 monolith to Spring Boot 3 microservices, cutting deployment time 42% and production incidents 36%.
• Automated CI/CD pipelines (UCD, Jenkins, Concourse), reducing deployment downtime 60% and improving release cadence.
• Refactored reactive data pipelines (WebFlux) to handle 25K+ concurrent users with 30% less memory usage.
• Designed and deployed analytics dashboard (Spring Boot + React), improving page load time 53%, increasing user sessions 1.7×, and enabling real-time insight tracking.
• Reduced system bottlenecks by designing REST APIs, integrating 50+ endpoints for efficient data flow, improving throughput by 45%, and reducing error rates by 20%.
• Orchestrated AI-driven data workflows using multimodal models, automating 3 key pipelines and reducing manual processing time 70%.
• Collaborated closely with product managers, QA teams, and business analysts to clarify requirements and align delivery timelines across departments.
• Standardized API documentation with OpenAPI/Swagger, reducing cross-team integration bugs 40%.
• Deployed Redis and Kafka caching layer, lowering latency from 850ms → 310ms.
• Mentored and coached 5+ junior engineers through structured feedback sessions and code reviews, improving communication efficiency and delivery cycles 22%.

FULL-STACK DEVELOPER | Italy Destination Service — Casper, WY (Jun 2018 – Jul 2021)

• Developed an end-to-end booking platform (React, Redux, Spring Boot) handling 5K+ monthly reservations.
• Introduced Next.js SSR, reducing load time 40% and improving SEO visibility 38%.
• Automated CI/CD pipelines (Docker, Jenkins), shrinking deployment from 40 min → 6 min.
• Implemented unit and integration test coverage (JUnit, Mockito, Jest), achieving 87% coverage and zero critical regressions.
• Partnered with marketing and sales teams to communicate technical constraints and translate data needs into actionable dashboards, improving conversion tracking accuracy 35%.
• Developed standardized technical presentation materials that enabled non-technical sales team members to articulate complex product concepts, improving conversion rates by 5% above average.

Education

USI University of Lugano / ASERI (Milan, Italy) - Sep 2014 – Oct 2017
Master of Economics and International Policies

Certifications

• Google AI Essentials • Google Prompting Essentials • Java Programming: Solving Problems with Software • Java Programming: Arrays, Lists & Structured Data

Languages & Soft Skills

English • Italian • Spanish • Ukrainian • Russian | Cross-functional communication • Mentorship & team leadership • Stakeholder collaboration
